## JOGMEC took part in the 17th International Sedimentological Congress in Fukuoka, Japan

---

Oil & Gas Technical Strategy and Planning Group

JOGMEC took part in the 17th International Sedimentological Congress in Fukuoka, Japan held from the 28th of August to the 1st of September 2006. In addition, we had a booth and put some panels and brochures. JOGMEC gave the following 4 oral presentations and 5 poster sessions.

- Characterization of gas hydrate-bearing sediments for an attempt to resource assessment, Eastern Nankai Trough, Japan.
- 3D seismic interpretation of submarine fans in the shallow structure beneath the sea floor in the northern part of the Kumano Basin, Japan.
- The Mallik Gas Hydrate Field, Mackenzie Delta, Canada –A Summary of Research and Development Studies of a Terrestrial Gas Hydrate Deposit–.
- Sequence Stratigraphy and Depositional Facies of the Upper Kharaib Oil Reservoir, offshore Abu Dhabi.
